Finds that nitrogen is an important factor in creating low-dissolved oxygen in Hood Canal. The legislature further finds that inputs of nitrogen to Hood Canal from on-site sewage systems are uncertain due to insufficient data and studies. Transferring operating funds to the public works assistance account.

Therefore, it is the intent of the legislature to provide funding over three biennia to the public works assistance account in order to replace funds diverted from the account by previous actions.

Provides that, beginning July 1, 2006, for six fiscal years through June 30, 2012, the state treasurer shall transfer the sum of twenty-five million dollars each fiscal year from the state general fund to the public works assistance account established in RCW 43.155.050, for a total of one hundred fifty million dollars.

Providing for the care and education of children in licensed staffed residential homes.

Finds that staffed residential homes, as currently licensed by the department of social and health services, are a type of group-care facility that provides quality services for children in a home-like setting, including expectant mothers and children with developmental disabilities.

Finds that the children served by licensed staffed residential homes primarily attend public schools, and that

their social and educational needs can be better met by collaboration and communication between the school district, the staffed residential home provider, and the department of social and health services.

Finds that community integration of children served in licensed staffed residential homes is beneficial to the children, helpful to their educational needs, and builds stronger relationships with community members.

Declares an intent that stronger relationships be created between staffed residential homes, school districts, the department of social and health services, and the community, to promote positive social and educational outcomes for children served by staffed residential homes.
